RESINOL WILL HEAL BABY'S ITCHING SKIN AUTO A

Resinol ointment and resinol soap are absolutely free from anything of a harsh or injurious nature, and can therefore be used with perfect confidence in the treatment of babies' skin troubles-eczema, teething, rash, chafings, etc.-where you wouldn't dare use ordinary "skin-cures." Resinol stops itching instantly and speedily heals even severe and stubborn eruptions. Doctors have prescribed it for the past nineteen years.

Resinol soap and resinol ointment clears away pimples, blackheads and dandruff, and is an invaluable household remedy for sores, burns, boils, piles, etc. Sold by every druggist .- Adv.

Crafty John.

"Mr. Snapp, I want two pounds of Mrs. Annie Dallam's butter. If it isn't Mrs. Dallam's butter I won't take it." The proprietor turned to his other customers. "Some people in my business," he said blandly, "don't like par ticular customers, but I sure do. It's my delight to serve them and get them what they want. I will attend to you in a minute, John." "All right," said John, "and be sure to get Mrs. Dallam's. A lot of my wife's relatives are visiting at my house and I don't want them to come back again."-Dearborn (Mo.) Democrat.

Instinct of Thrift.

AFTER SUFFERING TWO LONG YEARS

Mrs. Aselin Was Restored to Health by Lydia E. Pinkham's Vegetable

Compound.

Minneapolis, Minn. - "After my little one was born I was sick with pains in my sides which the doctors said were caused by inflammation. I suffered a great deal every month and grew very thin. I was under the doctor's care for two long years without any benefit. Finally after repeated sug-

gestions to try it we got Lydin E. Pinkham's Vegetable Compound. After taking the third bottle of the Compound I was able to do my housework and today I am strong and healthy again. I will answer letters if anyone wishes to know about my case."—Mrs. JOSEPH ASELIN. 628 Monroe St., N.E., Minneapolis, Minn.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotics or harmful drugs, and today holds the record of being the most successful remedy we know for woman's ills. If you need such a medicine why don't you try it?

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

To cure costiveness the medicine must be more than a purgative; it must contain tonic, alterative and cathartic properties.

season Made of metal, can'tspill or tip over, will not soil or injure anything. Guaranteed effective.

Each Year Shows That the Machines Have Achieved an Advance in Popular Favor.

CONTRIBUTE TO JOY OF LIFE

That They Will Ever Go Out of Style or Use Is Beyond Consideration-Prominent Manufacturer Tells Reasons for Optimistic Outlook.

As early as 1898, when The Haynes Automobile Company was still in its infancy, we decided to build for the following year about fifty cars. About the same time I learned that another firm was expecting to build 100 machines for the same year, and we wondered if both companies would sell the entire output of 150 cars, relates Elwood Haynes.

It was not a question in my mind whether the American people could buy these machines, but whether or not they would buy them. To my surprise we sold all we could make, and the public still clamored for more. Notwithstanding the tremendous strides which have been made in the business, this experience has been repeated each year without exception ever since.

The automobile has so established itself in thousands of American homes

Elwood Haynes, Builder of America's First Car.

t that it will not be given up excepting in certain cases where dire necessity demands it.

Not only does the owner of a machine take his own family out for pleasure driving, but frequently takes the children of his neighbors, so that it is now rather difficult to find a boy or girl in the more populous districts. who has never had a ride in an automobile.

The motor car will no more go out of style or out of use than the beautiful home, the piano, the Brussels carpet, or a hundred other things that contribute to the joy of life. It has decome the basis for outdoor life for thousands of families, contributing not only to their enjoyment, but to their health, peace of mind, and general well-being, affording, as it does, a long wished for pleasure and utility. which it has only been possible to realize within the past ten or twelve

The automobile buying season is in full blast, and many purchasers will be car owners for the first time. H. E. Doty, manager of the Haynes Motor Car Co., gives the following timely advice to such owners, which should dry one. be very helpful indeed:

"One of the most important things for the automobilist to learn is not to 'tinker.' There is no mystery concealed under the hood of a car, there is noth-

This is the oldest automobile in existence, and is now on exhibition at the Smithsonian Institution, United States National Museum, Washington, D. C., duly labeled as follows:

"Gasoline Automobile, built by Elwood Haynes, in Kokomo, Ind., 1893. 1894. Successful trial trip made at a speed of six or seven miles per hour, July 4th, 1894. Gift of Elwood Haynes, 1910. 265,135."

ing that should be kept secret from the car owner, but the temptation to the car sued the garage owner for 'tinker' usually becomes too great; a delicate adjusting screw is turned or an accident caused by the carelessness a wire is disconnected and thentrouble begins.

instructions, Pearn all you can, and the lessee of the car. then when the emergency comes, you'll be prepared. But wait for the emergency. Do not tinker. Don't try to make adjustments when the car is already in adjustment. Don't begin one motorcycle for every 1.382. Betearing down until you have located tween 1910 and 1911 there was the

timing of the valves or the ignition; the manufacturer knows bost. Treat your car as you would an expensive watch. A lot of trouble may be avoided by baving an expert examine the car about once every two months There are many little wrongs that may quickly develop into big wrongs if not discovered and checked.

"Don't patronize the cheap me chanic-his work is usually in keeping with his price. Keep your car out of the hands of the schoolboy who offers to work free of charge. The manufacturer is always ready to advise and help you. His reputation is in your hands and don't be too much inclined to blame the car when the first little trouble arises. Each ma chine has peculiarities of its own and no matter how experienced you may be in the operation of motor cars in general, it is essential that the manufacturer's instructions be carefully read and followed.

"The idea that there is no particular care necessary for the successful operation of a car, aside from filling the tanks and radiator is erroneous. There is no more carefully designed mechanism in existence, and as is usually the case with all complicated machines, careful inspection and attention to details will prolong its life and insure successful operation to an immeasurable degree.

"Treat your car well, lubricate it regularly. The result will be efficient then, when the emergency comes, when something does go wrong, don't just tinker.' Be systematic. First find where the trouble is; second, determine what it is; third, what is the remedy; and last, how this remedy may be applied."

NEED A REGULATING VALVE

Use of Water With Gasoline Means a Considerable Saving of Fuel to the Auto Owner.

With the exhaust gas heater some form of regulating valve should be used and a few cross partitions in the inlet pipe at the point where the heat is applied help heat the center of the column of the entering mixture. Gasoline will stand about eighty-five pounds compression without pre-ignition. Kerosene, however, will not stand over seventy pounds unless a small quantity of water is taken into the cylinder with each charge, The customary manner of doing this is to employ either a separate small carburetor for the water or a small valve attached to the regular carburetor. In a few engines the water is injected directly into the cylinder.

The proportion of water employed is about one and one-half pints of wa ter to each gallon of kerogene. If the

water is not used when the motor has the usual compression employed for gasoline the motor will pre-ignite and his apartments, placed the muzzle of the surrounded the great founder of the and so endeared itself to those who is very apt to burn out the connecting the rifle in his mouth and pulled the Here he married Sarah and here he rod bearings. It is not generally known | trigger with a toe. that water may be used to advantage with gasoline in about the same pro portion with considerable saving of an active part in local civic affairs.

Preserve Car Body.

For the particular man, one of the most trying things is to have the body work of his car get shabby. The following mixture makes an excellent 'restorer" for the body work: One pint of turpentine, one pint of wood al. cohol, one quart of distilled or rain water, one quart of kerosene oil. Mix the alcohol and turpentine together then mix the water and kerosene of together. In order to defy the old adage about oil and water not mix ing, it is necessary to place the kero sene and water in a gallon jar and shake briskly until they mix, then add the alcohol and turpentine, which have been previously mixed, and shake the whole until thoroughly mix ed. The mixture is apt to separate after standing, but can always be brought together again by brisk shak ing. The mixture should be applied to the body work with the soft side of a flannel cloth and polished with :

New Auto Safety Device.

The municipal authorities of Paris have under consideration an ordinance making it obligatory for all motor cars to carry a device by means of which passengers in the interior of their car may stop it instantly without the as sistance of the chauffeur. Such a measure would prevent accidents similar to that in which the two children of Isadora Duncan met their death Another preventable accident of the same kind was caused in Paris a short time ago by a chauffeur fainting on his box. The proposed device which the technical committee of the prefecture of the Seine has before it for consideration is said to be easily applied to any automobile at a cost of about \$10.

Carelessness of Chauffeur.

If an automobile is leased for pleasure ride, and the chauffeur mere ly obeys the instruction of the lessee as to the route to be taken, the owner of the car is responsible for any damage which might be caused by the chauffeur's negligence. This is the decision of the Supreme Court of Wisconsin, in the case of Gerretson vs. a ga rage company, in which the lessee of damages, because he was injured in of the chauffeur. The court held that in such a case the driver is the ser-"Talk to the repairman, study the vant of the garage owner, and not of

France Taking to "Cycles."

France has one automobile for every 500 people, one cycle for every 13 and the trouble. Don't try to improve the enormous increase of 300,000 cycles.

VETOED BY MINERS

EXECUTIVE BOARD OF UNION REFUSES TO ORDER ALL MEN OUT AT PRESENT.

Pledges Support to Colorado Strikers and Denounces John D. Rockefeller, Jr., Declaring He Could Have Averted Loss of Life.

Indianapolis, Ind .- The internationil executive board of the United Mine Workers of America adjourned Friday subject to the call of President John . White, after having been in sesdon since Monday, discussing the conditions of miners in Colerado, Ohio and West Virginia.

The board ssued a statement advising against a general strike "at this particular time,' but affirming in strong terms its support of the strikng miners of Colorado. The report also condemned John D. Rockefeller, ir., who, it was asserted, could have service at minimum upkeep. And averted the loss of life and damage to property in Colorado by saying "one word, favoring a settlement through a meeting between the representatives of the coal companies and the striking mployees.

The report stated that hundreds of equests had been received urging the calling of a general strike in the coal mines of the country, but that it was pelieved to be unwise to do so now, and adding that if conditions in Colorado became worse the policy of the board could be changed.

An appeal for aid was authorized by the board, when it was informed that a large number of individuals and organizations had asked permission of the international officers to contribute to the fund for the upkeep of the strikers in Colorado.

of Daylestown, Pa., that the ancient inhabitants of Mexico used a glazing process in the manufacture of their pottery has revolutionized the 'views of ceramic experts at the University of Pennsylvania, and may lead, says American Art News, to the discovery of beds of clay suitable for use today.

The ancient Egyptians, says Mr. Mercer, did not glaze their works, the Chinese adopting this precaution at a later date to make their vessels impervious to water. Civilization had been established by this time, however, and the use of the glazing art by prehistoric Mexicans may unfold interesting ceramics.
